

[2017 New Lead2pass Offering Free 70-347 Dumps Files For Free Downloading By 70-347 Exam Candidates (101-120)

2017 June Microsoft Official New Released 70-347 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed! I have already passed Microsoft 70-347 certification exam today! Scored 989/1000 in Australia. SO MANY new added exam questions which made me headache?.. Anyway, I finally passed 70-347 exam with the help of Lead2pass! Following questions and answers are all new published by Microsoft Official Exam Center: <http://www.lead2pass.com/70-347.html>

QUESTION 101 Your company has a hybrid deployment of Office 365. You need to verify whether free/busy information sharing with external users is configured. Which Windows PowerShell cmdlet should you use? A. Test-OutlookConnectivity B. Test-FederationTrust C. Get-OrganizationRelationship D. Get-MSOLDomainFederationSettings Answer: C

QUESTION 102 You manage an Office 365 tenant that uses an Enterprise E1 subscription. You configure a retention policy for all mailboxes. You must apply a new retention policy immediately because of upcoming personnel changes. You need to ensure that the new retention policy is applied to the mailboxes immediately. Which Windows PowerShell cmdlet should you run? A. Enable-JournalRule B. New-RetentionPolicyTag C. Start-ManagedFolderAssistant D. Set-CsUser E. Set-CsPrivacyConfiguration F. Set-HostedContentFilterPolicy G. Set-MalwareFilterPolicy H. Set-MailboxJunkEmailConfiguration Answer: C

Explanation: <https://technet.microsoft.com/en-us/library/aa998864%28v=exch.160%29.aspx>

QUESTION 103 Drag and Drop Question You have an Office 365 tenant that uses an Enterprise E3 subscription. You must prevent five specific users from using Skype for Business Online to send instant messages to external users. All other users must be able to send instant messages to both internal and external users. You need to configure the environment. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer: Explanation: To configure external communications for individual users Open the Skype for Business admin center: Sign in to the Microsoft Online Services portal, and then click Admin > Skype for Business. Click Users, select the users whose settings you want to modify, and then click Edit Click External communications, and then select or clear the options as appropriate: * Skype for Business users Skype for Business users in federated domains * People on public IM networks Users of the Skype public IM service. Click Save. <https://technet.microsoft.com/en-us/library/dn771172.aspx>

QUESTION 104 You manage an Office 365 tenant that uses SharePoint Online. The organization purchases a second domain name to use with SharePoint Online. You need to create a new site collection that uses the new domain name. Which two actions can you perform? Each correct answer presents a complete solution. A. From the SharePoint admin center, add and configure the domain. B. From the SharePoint admin center, rename the site collection by using the new domain. C. From the Office 365 admin center, add and configure the domain. D. From the Office 365 admin center, configure the Global Administrator user principal name to use the new domain. Answer: BC

Explanation: B: Create a Public Web Site by using a custom domain name 1. Go to SharePoint Online Administration Center and Click 'Site Collections'. 2. Click 'New' button and Click 'Public Website'. 3. Create your Public Website. At the URL, choose the custom domain name you want to use as a SharePoint Public Website address. C: The New-MSOLFederatedDomain cmdlet, part of Office 365, adds a new single sign-on domain (also known as identity-federated domain) to Microsoft Online Services and configures the relying party trust settings between the on-premises AD FS server and Microsoft Online Services. Reference: How to add a custom domain name in SharePoint Online with a federated domain environment <http://blogs.technet.com/b/ptsblog/archive/2012/06/25/how-to-add-a-custom-domain-name-in-sharepoint-online-with-a-federated-domain-environment.aspx>

QUESTION 105 You manage an Office 365 tenant with an Enterprise E3 subscription. You receive an eDiscovery request for a SharePoint Online site collection. You create an eDiscovery case. You need to find and preserve content for the eDiscovery. What should you do next? A. Create an eDiscovery set. B. Create a query filter. C. Export documents from the SharePoint site collection. D. Release the hold on the eDiscovery case. Answer: A

QUESTION 106 Drag and Drop Question Your company uses the Office Deployment Tool to deploy Click-to-Run for Office 365 ProPlus. Users report that confirmation dialog boxes do not appear during the installation of Office 365 ProPlus. You need to ensure that confirmation dialog boxes are displayed to users. How should you complete the relevant segment of the config.xml file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: Explanation: Box 1: Full If Display Level is set to Full, the user sees the normal Click-to-Run user interface: Automatic start, application splash screen, and error dialog boxes. Box 2: False If the AcceptEULA attribute is set to FALSE or is not set, the user may see a Microsoft Software License Terms dialog box. QUESTION 107 A company uses Office 365 ProPlus. The company has a main office and a remote office. The remote office experiences occasional bandwidth issues. You must deploy Visio Pro for Office

365 to selected users in a satellite office that experiences bandwidth issues. You need to deploy Visio Pro for Office 365 to a specific set of users. What should you do? A. Download the installer to a local network share and use the Office Deployment Tool to deploy the application to client. B. Use the Office 365 portal to allow users to deploy Visio Pro. C. Use the Office 365 portal to allow users to deploy Office 365 ProPlus. D. Download the installer to each local machine and use the Office Deployment Tool to deploy the application to the client. Answer: A Explanation: To deploy Office 365 ProPlus from an on-premises location, such as a local network share, you'll have to use the Office Deployment Tool to download the Office 365 ProPlus software from Office 365. Reference: Determine the deployment method to use for Office 365 ProPlus

<https://technet.microsoft.com/en-us/library/gg998766.aspx> QUESTION 108 Contoso, Ltd. has an Office 365 Enterprise E3 plan. Contoso uses the domain contoso.com for email and instant messaging (IM). Contoso requires that website visitors who go to <http://contoso.com> be directed to the company's Microsoft SharePoint Online public website. You need to configure Office 365 to redirect the website requests without affecting the company's email or IM. What should you do? A. In the SharePoint admin center, rename the public website to <http://contoso.com>. B. In the Office 365 admin center, change the domain purpose for contoso.com to SharePoint. C. On the authoritative DNS servers, add a CNAME record for contoso.com. D. In the Office 365 admin center, add a new subdomain. Then set up redirection for <http://contoso.com> to the subdomain. Answer: D Explanation: In this question, we need to redirect users to the SharePoint public website by using a root domain, Contoso.com. If we were using www.contoso.com, we could simply configure a CNAME record in DNS. However, this question states that "You need to configure Office 365 to redirect the website requests without affecting the company's email or IM". Email uses MX records. If you have a CNAME record at the root level of a domain, the MX records will not work. To use a root domain, we need to configure a redirect. First we need to add a subdomain such as www.contoso.com in the Office 365 admin center then configure the redirect to the subdomain. If you want users to see your site when they type just the root domain, contoso.com, contact your DNS hosting provider and ask if they have a URL redirection service to direct traffic from contoso.com to www.contoso.com. Most providers offer URL redirection, and you can check their documentation to learn how to set it up. Incorrect Answers: A: Renaming the public website to <http://contoso.com> on its own is not a complete solution. You would still need a CNAME record in DNS (if using www.contoso.com) or a redirection is using a root domain (Contoso.com). Therefore, this answer is incorrect. B: This question states that "You need to configure Office 365 to redirect the website requests without affecting the company's email or IM". Changing the domain purpose for contoso.com to SharePoint would affect Exchange (email) and Lync (IM). Therefore, this answer is incorrect. C: This question states that "You need to configure Office 365 to redirect the website requests without affecting the company's email or IM". Email uses MX records. If you have a CNAME record at the root level of a domain, the MX records (and the DNS records required for Lync) will not work.

<https://support.office.com/en-nz/article/Rename-your-SharePoint-Online-Public-Website-address-to-use-your-custom-domain-3d4bd288-772b-4f88-af4d-f025b3825ed3?ui=en-US&rs=en-NZ&ad=NZ> QUESTION 109 Hotspot Question Your company has an Office 365 subscription and uses Microsoft Lync Online. The environment includes the domains shown in the following image, and is configured as shown in the exhibit. (Click the Exhibit button.) Lync is not deployed in a hybrid configuration. An employee requires specific Lync communication settings. The employee's account is configured as shown in the following image. For each of the following statements, select Yes if the statement is true. Otherwise, select No. Each correct selection is worth one point.

Answer: Explanation: Internal communication (contoso.com), and external communication with fabrikam.com are both allowed. <https://support.office.com/en-us/article/Users-can-contact-external-Skype-for-Business-users-b414873a-0059-4cd5-aea1-e5d0857dbc94> QUESTION 110 You have an on-premises Exchange 2010 organization. All clients use Outlook 2007 SP1. You enable online archive mailboxes in Exchange Online for several users. The users are unable to access the online archive mailboxes in Microsoft Outlook. You need to ensure that users can access the online archive mailboxes in Outlook. What should you do? A. Apply Outlook 2007 SP2 and all related updates. B. In the Office 365 admin center, add the users to the Global Administrators group. C. Instruct the users to access the online archive mailboxes by using Outlook Web App. D. Delete and recreate the users' Outlook profiles. Answer: A Explanation: Users must use Outlook 2010, Outlook 2007 SP2, or Outlook Web App to access the cloud-based archive mailbox. You have been hired to migrate a legacy email solution to Office 365. You are creating a migration plan to identify the client computer components that must be updated for use with Office 365. The following table describes the two computer configurations that are part of the migration. You need to identify the required updates. Which updates are required? To answer, drag the appropriate status to the correct targets. Each status may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: Explanation: * Office 365 does not have an operating system requirement, except that the operating system you use must be supported by its manufacturer. * Office 365 is

designed to work with the following software:/ The current or immediately previous version of Internet Explorer or Firefox, or the latest version of Chrome or Safari./ Any version of Microsoft Office in mainstream support.

QUESTION 112A company uses Skype for Business Online. You use contoso.com as the verified domain name for the Office 365 tenant. Users conduct Skype online meetings. You add fabricam.com to the tenant and configure the tenant to use this domain name. You need to ensure that all Skype online meeting URLs contain the new domain name. Which Windows PowerShell cmdlet should you run? A. Update-CsTenantMeetingUrl B. Set-CsMeetingConfiguration C. Set-CsUser D. Set-CsMeetingRoom E.

New-CsSimpleURL Answer: A Explanation: This cmdlet replaces the old meeting URL with a new one that contains the custom URL instead. <https://technet.microsoft.com/en-us/library/dn424754.aspx> You need to ensure that all Skype online meeting URLs contain the new domain name. <https://technet.microsoft.com/en-us/library/dn424754.aspx?f=255&MSPPErr=-2147217396>

QUESTION 113 You are the administrator for Contoso, Ltd. You have an Office 365 tenant with Skype for Business Online. You have an account named Test.User@contoso.com. You configure the account to use the same email address and Session Initiation Protocol (SIP) address. You need to change the SIP address for the account to Test.User1@contoso.com. What should you do? A. In the Office 365 admin center, change the display name for Test.User@contoso.com to Test.User1@contoso.com. B. Run the following Windows PowerShell command: Get-MsolUser -UserPrincipalName Test.User@contoso.com | Set-MsolUser

-UserPrincipalName Test.User1@contoso.com C. In the Office 365 admin center, add the SMTP address Test.User1@contoso.com to Test.User@contoso.com D. Run the following Windows PowerShell command: Set-MsolUserPrincipalName -UserPrincipalName Test.User@contoso.com -NewUserPrincipalName Test.User1@contoso.com Answer: D Explanation: The Set-MsolUserPrincipalName cmdlet is used to change the User Principal Name (user ID) of a user. Example: The following command renames user1@contoso.com to CCole@contoso.com. Set-MsolUserPrincipalName -UserPrincipalName User1@contoso.com -NewUserPrincipalName CCole@contoso.com Reference: Set-MsolUserPrincipalName <https://msdn.microsoft.com/en-us/library/azure/dn194135.aspx>

QUESTION 114 You are the Office 365 administrator for your company. The company uses Microsoft Lync Online and wants to customize Lync meeting invitations. You need to identify the URLs that can be changed on the Lync meeting invitations from the Lync admin center. Which three URLs can be changed? Each correct answer presents part of the solution. A. Company URL B. Meeting URL C. Legal URL D. Logo URL E. Help URL Answer: C D E Explanation: * LegalURL: URL to a website containing legal information and meeting disclaimers. * LogoURL: URL for the image to be used on custom meeting invitations. * HelpURL: URL to a website where users can obtain assistance on joining the meeting. Reference: Set-CsMeetingConfiguration <https://technet.microsoft.com/en-us/library/gg398648.aspx>

QUESTION 115 You manage an Office 365 tenant that uses an Enterprise E1 subscription. A user receives frequent email messages from a specific domain that are flagged as spam. You need to ensure that the domain name is not flagged as spam for only the user. Which Windows PowerShell cmdlet should you run? A. Enable-JournalRule B. New-RetentionPolicyTag C. Start-ManagedFolderAssistant D. Set-CsUser E. Set-CsPrivacyConfiguration F. Set-HostedContentFilterPolicy G. Set-MalwareFilterPolicy H.

Set-MailboxJunkEmailConfiguration Answer: H Explanation: Use the Set-MailboxJunkEmailConfiguration cmdlet to configure the junk email rule for specific mailboxes. The junk email rule helps Microsoft Outlook and Outlook Web App users to automatically remove any spam that gets past anti-spam filters and reaches the users' mailboxes. With this cmdlet, users and administrators can make changes to the junk email rule that's configured for a specific mailbox. Example: This example disables the junk email rule configuration for the user named David Pelton. Set-MailboxJunkEmailConfiguration "David Pelton" -Enabled \$false Incorrect: Not G: Use the Set-MalwareFilterPolicy cmdlet to modify malware filter policies in your organization. Reference: Set-MailboxJunkEmailConfiguration [https://technet.microsoft.com/en-us/library/dd979780\(v=exch.150\).aspx](https://technet.microsoft.com/en-us/library/dd979780(v=exch.150).aspx)

QUESTION 116 Drag and Drop Question You are the Office 365 administrator for a company. Employees are allowed to purchase a desktop computer of their choosing. The company's owner has one desktop computer, two laptop computers, one Surface RT device, and 2 Surface Pro 2 devices. You plan to deploy Office ProPlus. You provide each user with an Office 365 ProPlus license. You need to deploy Office 365 ProPlus to the unlicensed devices using the fewest number of licenses possible. What should you do? To answer, move the appropriate license to the correct device. Each license may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: Explanation: Each Office 365 ProPlus license allows a user to install Office on up to five computers. If the user decides to install Office 365 ProPlus on a sixth computer, she will need to deactivate one of the first five. <https://technet.microsoft.com/en-us/library/gg982959.aspx>

QUESTION 117 Drag and Drop Question An organization has an Office 365 tenant that uses an Enterprise E3 subscription. The organization plans to migrate users to Office 365. You do not want users to install Office 365 ProPlus until you complete the migration. You need to prevent all users from self-provisioning Office 365 ProPlus. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions

to the answer area and arrange them in the correct order. Answer: Explanation:As an Office 365 admin, you can use the User software page in the Office 365 admin center to choose whether users can install Office software from the Office 365 portal. For example, you might want to let users install Word, Excel, and PowerPoint, but not Visio. Whatever you decide to do, your choice applies to all users.To choose which Office software that users can install from the portalSign in to Office 365 with your work or school account.Go to the Office 365 admin center, and then choose Service Settings > User software.In the Manage user software through Office 365 section you'll see a list of available Office software.If the check box is selected, users can install that Office software. By default, all check boxes are selected.Clear the check box if you don't want users to install that Office software.If you make a change, click Save.<https://technet.microsoft.com/en-us/us-en/library/jj219421.aspx> QUESTION 118You manage an Office 365 tenant that uses an Enterprise E1 subscription.You need to ensure that users are informed when Exchange Online Protection quarantines email messages.Which Windows PowerShell cmdlet should you run? A. Enable-JournalRuleB. New-RetentionPolicyTagC. Start-ManagedFolderAssistantD. Set-CsUserE. Set-CsPrivacyConfigurationF. Set-HostedContentFilterPolicyG. Set-MalwareFilterPolicyH. Set-MailboxJunkEmailConfiguration Answer: FExplanation: EnableEndUserSpamNotificationsThe EnableEndUserSpamNotification parameter enables or disables sending end-user spam quarantine notification messages. Valid input for this parameter is \$true or \$false. The default value is \$false.End-user spam notification messages periodically alert users when they have messages in the quarantine. When you enable end-user spam notifications, you may also specify values for the EndUserSpamNotificationCustomFromAddress, EndUserSpamNotificationCustomFromName, and EndUserSpamNotificationCustomSubject parameters. <https://technet.microsoft.com/en-us/library/jj200781%28v=exchg.160%29.aspx> QUESTION 119Drag and Drop QuestionYou are the Office 365 administrator for a company. You deploy Office 365 ProPlus. You plan to implement a software change control process for software updates.You have a group of test users that need custom updates.You need to install updates for only the test users.Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer: QUESTION 120Hotspot QuestionYou are the Exchange Online administrator for a company that has offices in Seattle, New York, London, and Paris. The StateOrProvince attribute in Active Directory is populated with each user's location.Employees must be able to send email messages to all users in Europe.You need to create the distribution group.How should you complete the Windows PowerShell command? To answer, select the appropriate segment from each list in the answer area. Answer: Lead2pass 70-347 PDF dumps is perfect! Totally!
